Profile

I am currently a second-year student at New York University. I am working toward a major in Computer Science. I am on track to graduate in three-years in the class of 2019. Before I graduate, I want to work somewhere where I can apply and further develop my skills on real life applications. I am looking for a place that will familiarize me with a professional working environment.

Experience

FOUNDER, CEO & CTO; WAYK!, NEW YORK, NY – JAN 2018 - PRESENT

- This is the latest iOS Application I have built
- Wayk uses a JSON formatted backend to hold user data
- Published to the App Store. To see more about the app visit: <https://itunes.apple.com/us/app/wayk/id1335200487?mt=8>

FOUNDER, CEO & CTO; THRED., NEW YORK, NY – JAN 2017 - PRESENT

- Thred. is a pre-alpha iOS and Android application.
- The app is an anonymous follower based social media application with a targeted college demographic.
- Thred. is in its first round of funding and the MVP, most viable product, is almost completed. It is set to launch in the fall of 2018.
- The primary language is Swift 4 and Java and it is coded on the Xcode IDE and Android Studio. The application uses a server for the backend that holds specific location objects, posts, follower objects, and accounts: username, email, password.

APPLICATION DEVELOPMENT INTERN; IHEART MEDIA INC., NEW YORK, NY

JUN 2017 - AUG 2017

- At iHeart, my tasks primarily consisted of web programming and application development.
- I independently built multiple iOS and Android applications in each respective native languages. I then deployed the apps as enterprise downloads to the company's thousands of employees.
- For these apps, I built .NET applications to manage the servers. The servers used Azure.
- My tasks also consisted of bug fixes to various projects, such as the companies public websites and public applications.
- At iHeart, I learned about how the industry worked and how to apply my knowledge to the industry. This was exemplified in that each application I built, I had to present to a client: corporate executives, human resources, etc.

Education

New York University – Computer Science, 2019

Computer Science GPA: 3.8

- At NYU, I received extensive training at the school's entrepreneur center, the Leslie eLab. I learned what users look for in software design and accessibility and how to target specific consumer segments.

Skills

- | | | |
|--------------|------------------|---------------------|
| • Swift | • PHP | • Xamarin |
| • Java | • Firebase | • Azure |
| • C# | • Parse | • Adobe Illustrator |
| • C | • Xcode | • Sketch |
| • HTML & CSS | • Android Studio | |
